

CAG Enhancement List

Main Dashboard (Milestone 2)

Free ID Count Mismatch

- Free ID count in the Dashboard and Rider Management module differs.
--> Onboarding count have to check x

- 1.Total Companies card - Add Active Companies & Inactive companies count
- 2.Total Vehicles card - Add Assigned Vehicles & Unassigned Vehicles count.
- 3.Remove the Total Orders card, as the monthly order count will be very high and is not useful on the dashboard.
- 4.Total Riders card - Please display the rider count based on the following statuses.

Company Status

Active, Onboarding, Visa Process, Local Transfer, Suspended & Terminated, Cancelled, Akama Transfer and Free ID

Client Status

Active, Client Suspended, Churn, Clearance Completed, Part-Time Ready, Working Part-Time

- 5.Keep the following cards as they are:

Vacation Status, Workforce, Total Pending EMI, Traffic Fines

6. Top riders and low performers are same – no changes
7. Orders completed card need in below format

Company, Month, last 6 months

KPI Cards (Total Completed Orders, Total Order Revenue, Average Orders per Rider)

Chart , Monthly Completed Orders Trend and Compare completed orders month by month.
Sample image for reference

8. Please merge the existing Company Summary and Finance Summary into a single section called Finance Summary.

This section should display the overall financial performance of the business.
Keep filters (Company, Month, Year)

1. Top Summary Cards

Display the following KPI cards:

Total Revenue, Total Payroll (Rider Payroll), Total Company Expenses, Net Profit, Pending EMIs & Pending Traffic Fines

2. Monthly Financial Trend

Display a chart comparing the following values month-wise:

Revenue, Payroll, Company Expenses, Net Profit

This chart will help compare business performance month by month.

3. Company-wise Financial Summary

Display a table showing:

Company Revenue Payroll Company Expenses Net Profit

The values should be calculated automatically based on the selected month and company filter.

4. Company Expense Breakdown

Display a pie chart showing company expenses category-wise.

Example categories:

Office Rent, Fuel, Vehicle Maintenance, Electricity, Internet, Government Fees, Marketing, Office Supplies, Miscellaneous

The chart should automatically update based on the selected month.

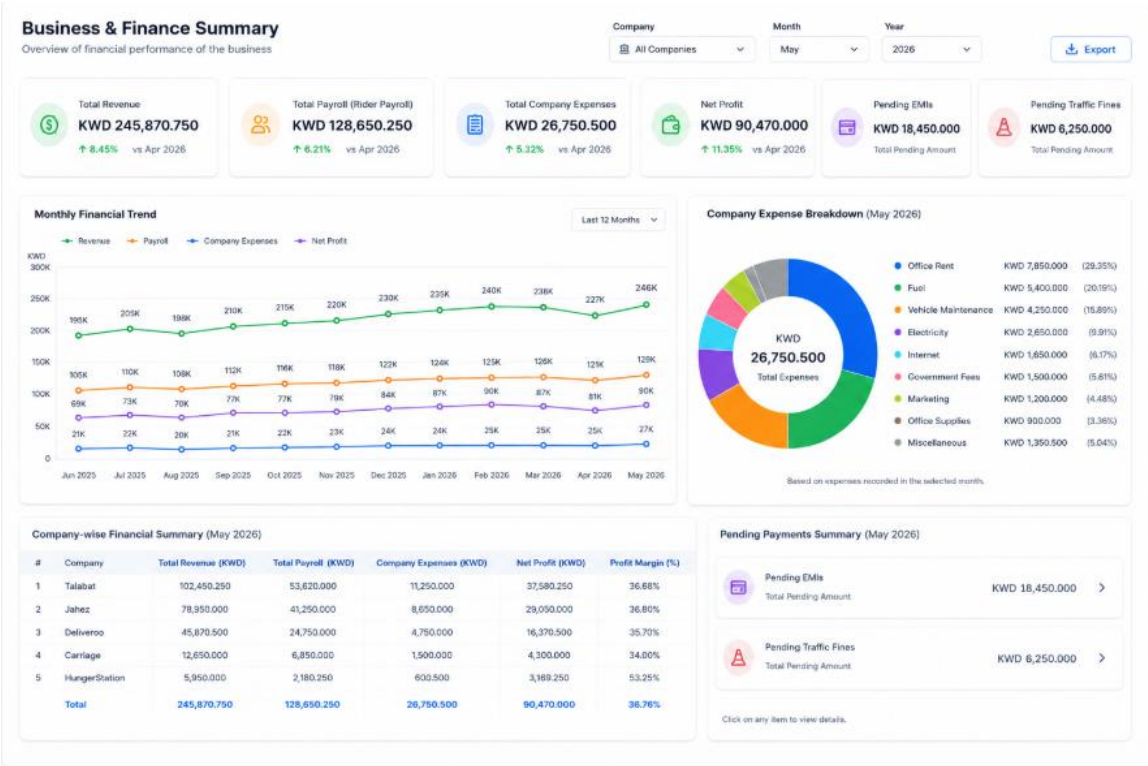

5. Pending Payments

Display the following pending values:

Pending EMIs

Pending Traffic Fines

Sample image

Expiring cars card changes

Currently, the dashboard displays Cars and Bikes that are expiring within the configured period. Please keep this existing functionality as it is.

Additionally, we need to show quota information at the top of each card.

Required Changes

Add Car Quota and Bike Quota fields in the Partner Company module so that we can configure the maximum allowed vehicles for each company.

On the dashboard, display the following counts for both Cars and Bikes:

Total Quota (from Partner Company)

Assigned Count (currently assigned vehicles)

Expiry Count (vehicles shown in the expiry list)

Pending/Available Quota

The Pending/Available Quota should be calculated as:

$$\text{Pending/Available Quota} = \text{Total Quota} - \text{Assigned Count} + \text{Expiry Count}$$

Since vehicles with expired documents cannot be considered active, they should also be included in the available/pending quota.

Example

Total Car Quota: 100, Assigned Cars: 90, Expiring/Expired Cars: 8

Display:

Total Quota: 100, Assigned: 90, Expiry: 8, Pending/Available: 18 (10 unused quota + 8 expiring/expired vehicles)

The expiry list should remain unchanged. This enhancement is only to display the quota summary at the top of each card.

Rider Management (Milestone 1)

Company and Client Status (Separate)

--> Please change status column as company status and also add one more column as client status

Captain Asad

Group of Companies

</

- Separate Company Rider Status and Client Rider Status.
 --> Company status keep as it is with all current options, Only remove free id option and add Legal issue option

--> Add a Client Status field under the Employment Information section in the Client Details page.

The field should be a drop-down (select) option.

The selected client status should be saved and displayed in the client details.

- Need to provide the list of statuses.

--> Please find the list of status (Active, Client suspended, Churn, Clearance Completed, Free Id, ID Issued for Part-Time)

--> If a client is marked as Vacation, the Company Status should automatically update to Vacation.

When the client is changed back from Vacation to Active or any other status, the Company Status should automatically update from Vacation to the previous status.

--> If will mention as part time then it should goes to part time module and there

- Where to use this Client Rider Status?
- Where should Client Status be entered?
- - If it belongs to Client ID: Client User ID module and HR Workflow.
- Need an end-to-end workflow.

Next

Onboarding Process Update : The overall onboarding process will remain the same.

Required changes:

1.Keep the existing options for Vehicle Type (Car/Bike), Visa Process, Location Transfer, and Employment Type (Full-Time/Part-Time).

2.Add a new field: Order Type.

Order Type should be a drop-down with the same values configured in the Order module.

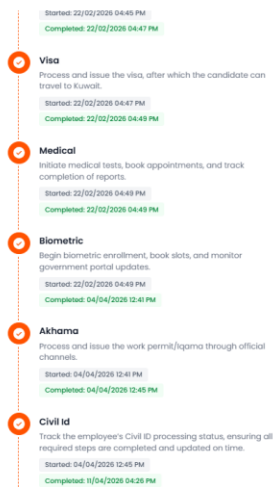

3.The remaining onboarding process should stay unchanged until the License Process.

4.Client Status - Add a Client Status drop-down in the Arara Pending stage.

The status will be updated manually based on the approved status list.

The selected Client Status should automatically update in Client Details.

5.Provide an Edit option in Client Details to allow updating the Client Status whenever required.

Form fields:

- Hiring Status: Select
- Applied for Training: Yes No
- Training Completed: Yes No
- Rider Status: Select
- Client: Select client...
- Client Contract Expiry: Select client contract expiry...
- Client User Id: Enter...
- Task Status: In Progress
- Remarks: Enter Remarks about the task

Rider status and client assignment will be updated only when the task is completed.

Rider Performance Tab Export (Milestone 2)

- Performance should also be available in Dashboard.
- Provide the list of details you need from the shared screen shot (What are all the data we need to show)
- Clicking on a rider name should open a separate Performance page.

--> Please use the shared sample image as the reference for the layout. Modify it according to the requirements below.

1. Rider Information

Display the following details:

Rider Image → Fetch from Documents → Selfie

Rider ID

Rider Name

Civil ID

Mobile Number

Company Code

Company Status

2. Client Information

Client Name

Joining Date

Salary Type

Client Status

Client Contract Expiry

Zone

3. Finance Summary Cards (Top Right)

Keep the following cards as shown in the sample:

Total Earnings

Total Deductions

Net Payable

Pending Deductions

4. Earnings Ledger

Keep the same layout as the sample.

Data Source - Client Sheet (Payroll Upload)

5. Expense Ledger (Transaction Wise)

Keep the same layout.

Data Source -Expense Module

Show all expense transactions applicable to the rider

6. Incentive Management

Keep the same layout.

Data Source-Expense Module

If an incentive is added from the Expense Module, the same transaction should automatically appear here.

7. Orders

Keep the Orders table exactly as available in the current system.

No UI changes required.

8. Attendance

Keep the Attendance table exactly as available in the Performance module.

9. Performance

Since the Earnings Ledger already contains order and earnings information, this separate Performance section may not be required.

Please review and suggest whether it can be removed to reduce screen space.

10. Company Assets

Enable this section as shown in the sample.

Display all assigned company assets from:

Properties Module

Vehicle Module

11. Payroll Calculation

Keep the same layout as the sample.

Display:

Earnings

Orders Revenue

Incentives

Bonus

Other Earnings

Deductions

Traffic Fines

Advances

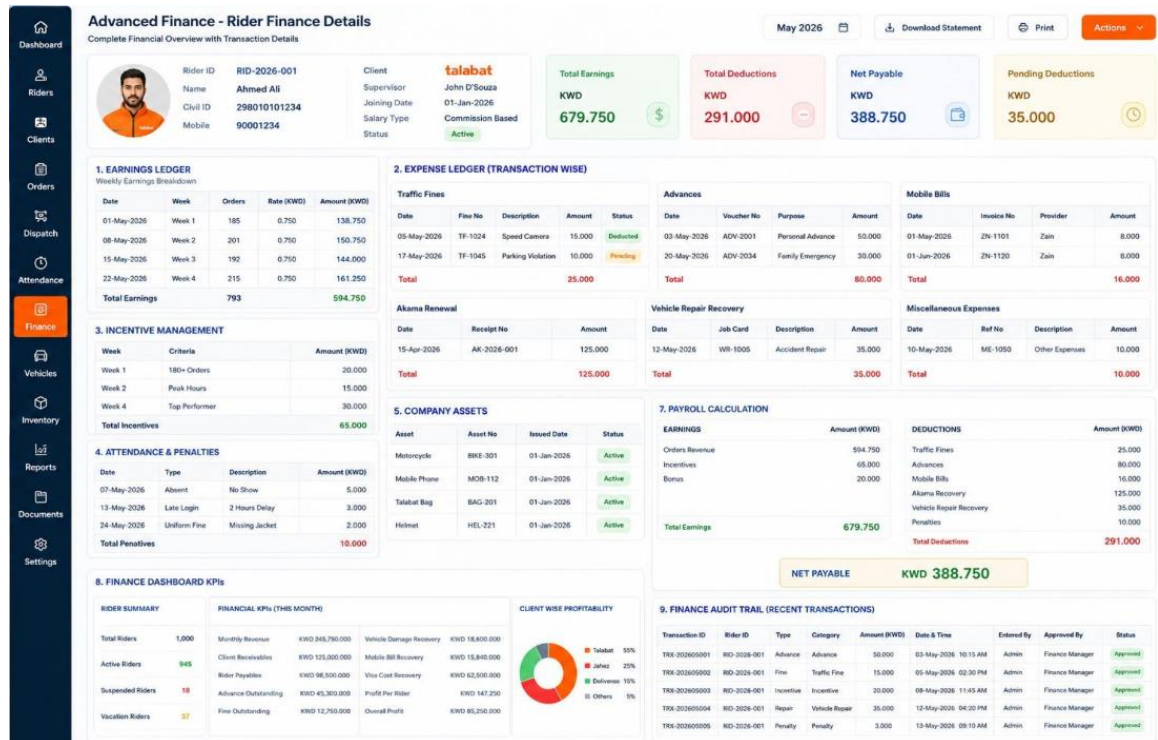

Mobile Bills

Other Deductions

Finally display - Net Payable

12. Finance Dashboard

Remove this section not required, if any changes required will modify in our main dashboard.

Rider Expense (Milestone 1)

- Add Rider Expense History.
- Add Bulk Import option.
- Change UI to Table View.
- Add 'Add' and 'Import' buttons.
- Support + / - operations in Rider Expense.

Complaint Section (Milestone 1)

- All departments should be able to add comments on the rider.

Add Two Order Values (Milestone 1)

- During Rider Onboarding, add a dropdown to select Rider Category for the new Free Visa Order Value.
- Company bike or Own bike applies for Free Visa?
--> What are the order types available in the **Order Values**, We can use the same list and show all the options in a drop-down during the onboarding process. Based on the selected **Order Type**, the payroll should automatically calculate using the respective order values configured for that type.
- Need to add option to add the order value type.

- Need to add dropdown in rider onboarding for order-value.

Order Value Update

- Add two order values.

Part-time & Temporary Riders (Milestone 1)

- Create separate modules.
- Only for payroll?
- Separate workflows from onboarding to payroll.

Part-Time Rider & Free ID Management

Please use the following Client Status list throughout the system:

Active, Client Suspended, Churn, Clearance Completed, Free ID, ID Issued for Part-Time, Vacation

Free ID Process:

If a client's status is changed to Free ID:

The Client Status should automatically update to Free ID.

The client should automatically appear in the Part-Time Module under the Available Free IDs list.

If a rider is onboarded as Part-Time from HR module

The rider should also appear in the Part-Time Module.

The rider's default status should be Ready to Work.

Part-Time Assignment Process:

The Part-Time Module should allow assigning a Part-Time Rider to any available Free ID.

Once assigned:

The Part-Time Rider status should change to Working.

The original employee (whose client ID is being used) should have the Client Status updated to ID Issued for Part-Time.

The assigned Free ID should no longer appear in the available Free ID list until it is released.

Part-Time Module UI

Create a separate Part-Time Management page with the following sections:

Available Free IDs Display:

Client ID

Rider ID

Employee Name

Company Code
Current company Status
Action (Assign)

Part-Time Riders Display:

Rider Name
Rider ID
Mobile Number
Employment Type
Status (Ready to Work / Working)
Assigned Free ID means permanent rider id, client id and rider name

Active Assignments Display:

Free ID
Original Employee name
Assigned Part-Time Rider id and name
Assignment Date
Current Status
Action (Release / Change Assignment)

Release Process

When a Part-Time Rider is released:

The rider status should change back to Ready to Work.

The Client Status of the original employee should change from ID Issued for Part-Time back to Free ID.

The Free ID should become available again for another assignment.

Payroll Integration

When a Free ID is taken back from a Part-Time Rider, the system should ask the supervisor to enter the total completed order count for that assignment.

Once submitted:

The entered order count should be saved against that assignment.

The assignment history should also record the Assignment Date, Release Date, Part-Time Rider, Client ID/Free ID, and Company.

The recorded order count should be used directly in the Payroll Module to calculate the Part-Time Rider's salary.

This order count should remain unchanged after the assignment is closed.

Rider More Details (Milestone 1)

- Remove tabs.
- Use scrolling layout with a second row.

Vacation Management (Milestone 1)

- Add an Edit Vacation option.
- Vacation Overdue logic is not working fine
- Remark column in Vacation overdue
- If vacation is extended, supervisors should be able to update the dates.
- Rider status should automatically update based on revised vacation dates.
- Update rider status when vacation period is overdue.
--> Also Record **Vacation Added By** and **Added Date & Time**. If the vacation details are edited, record **Updated By** and **Updated Date & Time**. This will help us track who created or modified the vacation record.

Sales Cash Module (Milestone 1)

- Add Payment Type options: Cash / Online.
- Include Payment Type in Export report.
- Add a Print Receipt option for each Sales Cash entry.
- Last 6 months data

Created by and time already there and also please add If an entry is edited, record Updated By and Updated Date & Time.

Please find the sample receipt.

Kindly include the following details on the receipt:

Name

Mobile Number

Company Code

Rider ID

Client ID

Payment Method

Received By (Supervisor name who entered the payment)

User our company logo and company name : Captainasad Group of Companies

Mobile Number: 67691486
Driver ID: Q101

Transaction Type: Cre
Payment Method: Cash Payme
Collected By: Driv
Order ID: 25161
Received By:
Received Amount:

Documents Module (Milestone 1)

- Update the UI as per the shared screenshot.
- Remove the mandatory Expiry Date requirement because even Selfie documents are asking for an expiry date.

--> Please reduce the spacing between fields to minimize scrolling.

Update the layout as per the sample screenshot shared.

Add a **View** option so the document can be opened and viewed on the same page.

Also, allow uploading **2 or 3 images/files** under the same document type if required.

Date	Document Type	Source
15.06.2026, 16:32	id card front	Manager
15.06.2026, 16:32	passport front	Manager
15.06.2026, 16:32	criminal record front	Manager
15.06.2026, 16:32	vehicle registration front	Manager
15.06.2026, 16:32	hygiene upload	Manager
15.06.2026, 16:32	work permit front	Manager
15.06.2026, 16:32	personal picture	Manager
15.06.2026, 16:32	driver licence front	Manager
15.06.2026, 16:32	id card back	Manager

Company Expenses Module (Milestone 2)

Expense Module

- └— Expense Entry
- └— Expense List
- └— Analysis Dashboard

Expenses entry screen.

- 1.Date - show option to enter
- 2.Company - Dropdown (companies listed)
- 3.Expense Category - Dropdown (Examples : Office Rent,Electricity,Internet,Vehicle Maintenance,Fuel,Mobile Bills,Office Supplies,Staff Welfare,Marketing,Visa Expenses,Municipality,Government Fees,Software Subscription,Insurance,Bank Charges,Miscellaneous)
- 4.Amount - manual entry
- 5.Payment Method - Cash / Bank / Online
- 6.Reference No - Optional
- 7.Remarks- Text
- 8.Attachment - Upload Bill
9. Added By - name
10. modified by - name, date and time
11. Save option

Expense list

Instead of hardcoding the expense categories, please create an Expense Categories master. We can add new categories whenever required, and the same list should automatically appear in the Expense Entry screen as a dropdown

Analysis Dashboard

The Analysis Dashboard can automatically calculate from the Expense entries and show cards such as:

Total Expenses (Today)
Total Expenses (This Month)
Company-wise Expenses
Category-wise Expenses

Below the cards, add charts like:

Company-wise Monthly Expenses
Category-wise Expenses

- Monthly Expense Trend

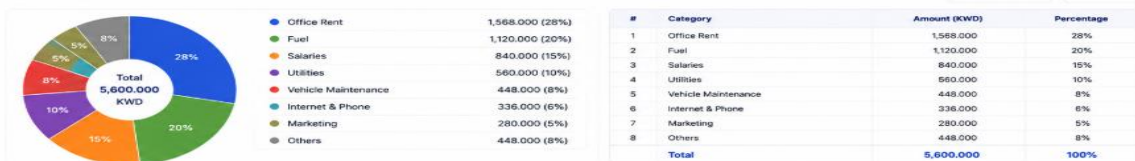

sample image

* use company code instead of company name

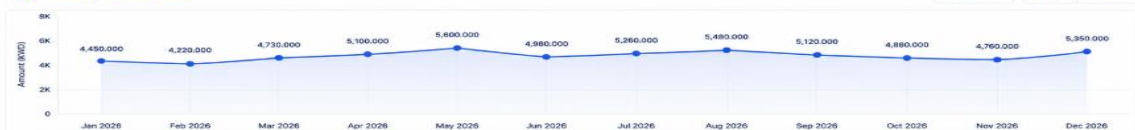

1. Company-wise Monthly Expenses

#	Company Name	Jan 2026	Feb 2026	Mar 2026	Apr 2026	May 2026	Jun 2026	Total (KWD)
1	Talabat	1,250.000	1,180.000	1,320.000	1,410.000	1,520.000	0.000	6,680.000
2	Jahez	980.000	920.000	1,050.000	1,120.000	1,230.000	0.000	5,300.000
3	Deliveroo	850.000	810.000	920.000	1,000.000	1,120.000	0.000	4,700.000
4	Carriage	650.000	620.000	680.000	750.000	820.000	0.000	3,520.000
5	HungerStation	720.000	690.000	760.000	820.000	910.000	0.000	3,900.000
Total		4,450.000	4,220.000	4,730.000	5,100.000	5,600.000	0.000	24,100.000

2. Category-wise Expenses

3. Monthly Expense Trend

Mandoop Activities (Milestone 1)

- Activity Types (Milestone 1)
- Add Activity (Milestone 1)
- Activity List (Milestone 1)
- Follow-up Dashboard (Milestone 2)

Activity Types (Master) Instead of hardcoding, create a master list so you can add new activity types anytime.

- Example: Legal Issue , Daftar Renewal , Akhama Renewal , Visa Renewal , License Renewal , Municipality , PACI , Medical , Residency Transfer , Company Documents and Other
- Add Activity Activity Type - Dropdown Company code - dropdown Rider - Dropdown Client (Optional) - Dropdown Priority (Low, Medium, High, Urgent) Subject - Text Description - Text Area Due Date - Date Assigned To Mandoob (will create users for them) Status (Open, In Progress, Pending, Completed, Cancelled) Attachment - Upload Created By - Name, date and time
- Follow-up Section

Every activity should support unlimited follow-ups.

Example:

Follow-up Date	Remarks	Next Follow-up	Status	Updated By
01-Jun	Submitted documents	05-Jun	Pending	Admin
05-Jun	Waiting for approval	10-Jun	Pending	Mandoob
10-Jun	Approved	-	Completed	Mandoob

4. Dashboard Cards

At the top display - Total Activities , Open , Pending , Completed , Overdue , Due Today

5. Filters

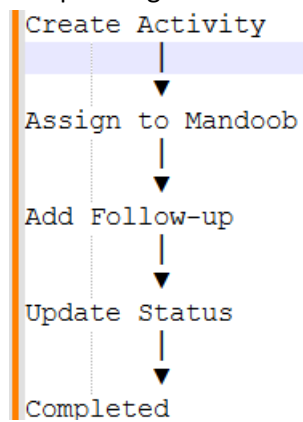

Company Activity , Type , Status , Priority, Assigned To , Month , Date Range

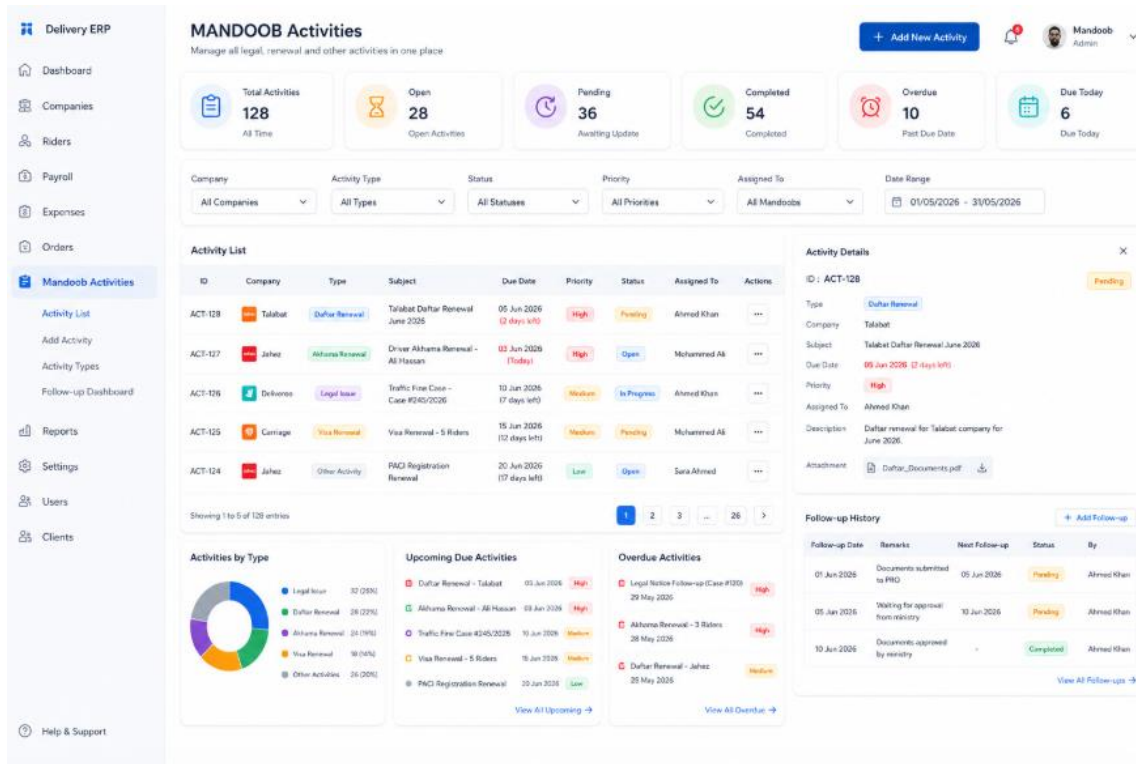

6. Activity List

Activity ID Company Type Subject Due Date Priority Status Assigned To

Clicking an activity opens the full details and follow-up history.

Sample image and workflow

- Other changes:
 1. Please add a filter option for the Source field so that we can filter records by Company or Rider when required.

Path: Dashboard → Expiring Documents

Compliance & Documents

Expiring Documents						Export	Next 30 Days
Source ID	Source	Document Type	Expiry Date		Days Left		
COMP260	Company	Ethimat Tholia - Maroor	2026-01-05T00:00:00		-182		
RD260941	Rider	Kuwait Driving License	2026-01-18T00:00:00		-169		
RD261070	Rider	Visa	2026-01-27T00:00:00		-160		
RD261048	Rider	Visa	2026-01-27T00:00:00		-160		
RD261050	Rider	Visa	2026-01-28T00:00:00		-159		

2. Please add an option to enter the vehicle color in the Vehicle Module. This field should be available while adding or editing a vehicle.
3. Currently, when a rider's status is changed to Vacation, the assigned vehicle is automatically unassigned.

Required Change:

Remove this automatic vehicle unassignment.

The assigned vehicle should remain linked to the rider even when the rider's status is changed to Vacation.

If the vehicle needs to be unassigned in exceptional cases, it should be done manually by the user.

For Payroll, continue to calculate based on the Vehicle Type, as discussed earlier.

4. When adding a new rider, the rider record is successfully created in the system, but the uploaded documents are not being saved.

Additionally, the system displays a "Failed" popup message even though the rider entry has been added successfully.

5. Currently contract expiry alerts require multiple navigation steps to update expiry dates. Please add an edit option directly in the alert listing with popup update functionality. After saving, the system should refresh the alert list and maintain the current position. Also suggest adding bulk expiry date update for multiple riders to reduce daily manual work.

6. When a vacation entry is created for a rider, the rider's Company Status should automatically change to Vacation.

If the vacation end date is overdue and the vacation entry is still open, the Company Status should automatically change to Vacation Overdue.

Once the vacation entry is closed, the Company Status should automatically change back to Active.

7. Restrict Rider Status Changes

Restrict the following rider status changes so that only Admin and Operations Manager can update them.

(Akhama Transfer, Terminated, Suspended and cancelled)

All other rider statuses can continue to be managed by Supervisors as per the current flow.

8. Expenses & Down Payment Updates During Hiring

Currently, expenses and additions can only be updated after the HR process is completed.

This needs to be changed because some charges (e.g., Admin Fees) are collected during the hiring process.

Additionally, any expenses paid by the company during onboarding should be recorded before HR completion.

Please add an option to update Expenses and Down Payments during the hiring/onboarding process, without waiting for HR completion.

Calculation

We have multiple companies, and each company has its own shareholders.

Requirements:

Display the Company-wise Net Profit on the dashboard.

split the net profit between the shareholders based on their profit-sharing percentage.

Provide an option to record manual adjustments between shareholders (amount added or deducted). For example:

Shareholder A transfers an amount to Shareholder B.

Manual credit or debit entries.

Maintain a complete transaction history for every adjustment with:

Date

Company

From Shareholder

To Shareholder (if applicable)

Amount

Reason/Remarks

User who created the entry

After applying all adjustments, display the Final Profit Payable for each shareholder.

Include filters by Comp
